SUMMARY

Fullstack Web Developer with 2+ years of experience designing, developing, and deploying innovative, user-focused solutions from scratch. Hands-on Engineer and Motivated Self-starter focused on leveraging the latest software and frameworks to create cutting-edge new features that drive application performance, reliability, and stability and optimize the user experience.

SKILLS

- **Engineering:** Product Roadmap, Frontend, Backend & Infrastructure, Cloud Architecture, API Development & Integration, RESTful Web Services, Microservices, Software Design & Coding, Testing & Code Coverage, CI/CD, DevOps, Software Quality, Scalability, Performance, Reliability, Automation, Code Reviews, Documentation
- **Leadership:** Strategic Planning & Execution, Project Management, Prioritization, Process Improvement, Cross-functional Collaboration, Training & Development, Coaching & Mentorship, Executive Reporting, Agile/Scrum
- **Software:** Javascript, React.js, Node.js, Express, Java, React Native, HTML/CSS, SQL, MongoDB, Bootstrap, Git

EDUCATION & CERTIFICATIONS

- **Full Stack Web Development - Engineering Flex, Thinkful**
  - Worked with a Senior Web Developer to create and deploy full-stack mobile-first applications with new languages and frameworks including HTML, CSS, Javascript, jQuery, ReactJS, Node, ExpressJS, and Sequelize.
- **Oracle Certified Associate Java SE 8 Programmer, Oracle**
- **Associate of Science in Computer Information Systems, Community College of Philadelphia**   Expected Winter 2022

RELEVANT EXPERIENCE

Software Engineer, Capgemini   June 2021 - April 2022
- Worked with a premier mutual fund company in the Philadelphia region to implement frontend and backend solutions for test-driven development with a 12-person agile development team.
- Built Angular web applications and RESTful microservices using Java hosted on the AWS cloud.
- Developed and updated user signup interfaces and processes for millions of users with Node.js, Java, Spring, and Angular

Frontend Web Developer, Assist Digital   October 2020 - September 2021
- Developed new user-facing features including online bill payment processing, consumption usage views, setup, and disconnect services for awater utility web application.
- Collaborated with backend developers and web designers to improve application performance, drive scalability, and optimize the user experience using the latest React.js methodologies and custom libraries.
- Built reusable code and libraries to reduce future development time and validated user input before final submission.
- Ensured the technical feasibility of UI/UX designs for new and improved features in collaboration with the UI/UX team.

Teaching Assistant - UPenn Coding Bootcamp, Trilogy Education   February 2020 - February 2021
- Empowered students to become successful developers by conducting and guiding classes of up to 30 students through in-depth debugging processes, and grading and reviewing assignments to ensure concept mastery.
- Managed the class Git repository, monitored issues, and coordinated with the central curriculum team to ensure resolution.
- Taught students on technologies including BootCamp HTML, CSS, Bootstrap, Git, Javascript, jQuery, Node.js, Express, MySql, MongoDB/Mongoose, and React.js. during class and officer hours.

Learning Assistant, Trilogy Education   April 2020 - October 2020
- Remotely answered questions and guided learning on Trilogy's Full Stack Web Development Bootcamp curriculum for thousands of students using Slack and Zoom.
- Led students through concepts ranging from frontend languages and frameworks and databases, server-side languages, and libraries to version control and deployment using Git and Heroku.
